DETAILED ACTION

Allowable Subject Matter

1. **Claims 1 – 3** are allowed.
2. The following is a statement of reasons for allowance:
 - a. **Regarding claim 1**, while IBM Technical Disclosure Bulletin NN880179 and Moraru disclose a hard disk simulator that emulates the behavior of the head actuator, neither of these references taken either alone or in combination with the prior art of record disclose a hard disk simulator including specifically: emulating reading and writing of data in the read/write channel based upon a model of the read/write channel; providing a disk controller design base for defining integrated circuit elements comprising the disk controller circuit; providing a controller environment to support execution and debug of firmware for operating the disk controller circuit; performing a plurality of disk functions according to a script, wherein performance of at least one of the plurality of disk function comprises the execution of the firmware, and wherein the plurality of disk functions comprises interaction of the read/write channel model, the electromechanical model, the disk controller design base and the controller environment; in combination with the remaining elements and features of the claimed invention. It is for these reasons that the Applicant's invention defines over the prior art of record.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
